

Situation :

You are an assistant manager for a company specialising in computer software. Your boss has asked you to organise a day out for company employees. The aim of the day is to improve staff efficiency and encourage team spirit.

You must choose a day out from the adverts below and present it to your boss justifying your arguments. You have a budget of £160 per person.

Take the following elements into account :

- Budget
- Your colleagues' preferences (see their opinions below)
- Improving team spirit
- Improving staff efficiency
- Day out ideas

Staff preferences

"My ideal day would be gentle quiet activities. Some cocooning would be much appreciated. And why not some nice food and wine"

Jenny, 27, Human Ressources

"I would like to do something stimulating and fun! I'm quite sporty and competitive so a competition involving sport would be perfect!"

Rob, 50, Software designer

"I'd like to do something cultural. It would also be nice to try new food too. Otherwise, I don't mind gentle exercise, but nothing too hard"

Lindsey 35, secretary
